**LogiSync teams with Franke Foodservice Systems and Introduces
First Agency-Approved LonWorks® PowerLine Gateway for the
Food Service Industry**

AVON, Ohio – January 18, 2008 – **LogiSync LLC**, a leading developer and provider of embedded network control systems, today announced the availability of the Franke LonWorks PowerLine Gateway (PLG). Developed in conjunction with Franke Foodservice Systems, the PLG is the first agency-approved LonWorks PowerLine Gateway for Quick Service Restaurants (QSR).

The PLG brings embedded network controls to Foodservice OEM equipment, providing “smart” technology to fryers, grills, refrigeration, toasters, beverage equipment, etc. and improves equipment value and utility for the restaurant owner through energy management, predictive maintenance and real-time equipment diagnostic capabilities. The Franke LonWorks PowerLine Gateway complies with global standards requirements for information technology equipment and can be utilized world-wide to improve the efficiencies of QSR kitchen equipment connecting to Echelon’s LonWorks PowerLine networking technology.

About LogiSync LLC

Established in 1993, LogiSync is a leader in the development, manufacture and supply of networked embedded control systems. Drawing on a wealth of standard products and design expertise, LogiSync offers customer tailored solutions for the medical, telecommunications, building automation, transportation, process control, and other industry-related markets.
